## University of Engineering and Technology Lahore Course Outline Report Subject: SE-324L Principles of Web Engineering Lab

## **Course Description**

A course focusing on the development of dynamic content and applications to facilitate information distribution. The course stresses development strategies for managing the rapidly changing information of corporations and organizations for just-in-time distribution, using authoring programs to create interactive multimedia products that utilize database management systems, file systems, and HTML/XML to provide a method for visualizing and manipulating that data. Significant time is spent on intermediate to advanced programming and scripting. Students are required to plan, design and implement a major project. Topics include intranets, networks, the World Wide Web, development languages, and other newly developed technologies.
